

**IN THE DRAWINGS:**

Please amend Fig. 3 of the Drawings as shown on the  
"Replacement Sheet" attached hereto.

## REMARKS

Reconsideration of this patent application is respectfully requested in view of the foregoing amendments, and the following remarks.

On page 2 of the Notice of Allowability dated July 7, 2006, it was stated that:

"The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the means for a telemetric signal tap (See claim 13) must be shown or the feature(s) canceled from the claim(s). No new matter should be entered."

In response to this objection, the drawings are being revised in order to amend FIG. 3 to add "means 11" to indicate a telemetric signal tap. Also, the present Specification is being amended on Page 4 in the bottom paragraph in lines 18 to 30 to provide support for the "telemetric signal tap" of claim 13.

Thus, the Specification now provides specific support for "means 11" which is now shown in FIG. 3 and which illustrates this feature of the invention specified in claim 13.

No new matter has been introduced by this Amendment. Entry and consideration of this Amendment Under Rule 312 is believed to be proper, (1) because it removes the outstanding issue as to the Drawings, (2) since no new matter is being introduced, and (3) because no further searching is involved.

Respectfully submitted,  
Lothar BRÜCKNER ET AL.
